sion, we felt we were in ain Psychologist didn't —they gave us hope. port our daughter at

ological Evaluations

I was nervous about undergoing a neuropsychological evaluation, but the experience was nothing like I expected. The doctors were kind, insightful, and really took the time to explain everything. I felt seen and understood for the first time in years.

Adult child

Adult Neuropsychological Evaluation

My father's cognitive issues had been misdiagnosed for years. The Brain Psychologist team helped us get to the root of the issue and connected us with the right resources. We're so grateful.

Caregiver

Professional Consultation & Supervision

They combine deep clinical expertise wit genuine compassion. The team took the t to understand my history, and their insig have been life-changing.

What is a neuropsychological evaluation? −

A neuropsychological evaluation is a comprehensive assessment conducted by a trained neuropsychologist to assess how various cognitive abilities and behaviors are functioning in an individual. This evaluation typically involves a series of standardized tests and measures to evaluate memory, attention, problem-solving, language abilities, visual-spatial functioning, motor skills, and emotional functioning.
